AI TUTOR WORKFLOW

*A drop-in study system for any certification
or exam, powered by the AI of your choice.*

DIGITAL LYCEUM

BY JOSEPH KEMP

HOW IT WORKS

A single file you give to your AI — Claude, ChatGPT, Gemini, any of them. It onboards you, then runs your daily study workflow. You get a real tutor, not a generic chatbot.

WHAT THIS IS

A drop-in study system in active use on a real certification prep. Onboarding asks a handful of questions, then your AI runs you through a daily loop built around blocks, flashcards, and an objective move-on gate.

WHO THIS IS FOR

Anyone studying for a certification, license, or professional exam who wants structure without paying for a course or coach. Especially good if you've been bouncing between videos, flashcards, and practice tests with no system tying them together.

THE SYSTEM

Five ideas working together: block-based progression, a daily flow, an objective move-on gate, a four-phase plan, and twice-daily check-ins.

- 1 **Weak Areas review** — flashcards of prior misses
- 2 **Oral drill** — AI verbally quizzes you on today's themes
- 3 **Existing flashcard review** — daily Anki maintenance
- 4 **Read** — book chapter for the current block
- 5 **Watch** — video lecture for the current block
- 6 **New flashcards** — up to 5 new cards from today's reading
- 7 **Cold block quiz** — practice questions, no warm-up
- 8 **Mine misses** — every miss becomes a new card
- 9 **PM check-in** — log score, set tomorrow's first move

THE BLOCK GATE

≥ 80% on a topic quiz, or **3rd attempt regardless** — move on either way. Cumulative tests in later phases catch what's still soft.

PHASE I

Foundation

Build the base. No tests yet.

PHASE II

Practice

Cumulative tests. 70%+ target.

PHASE III

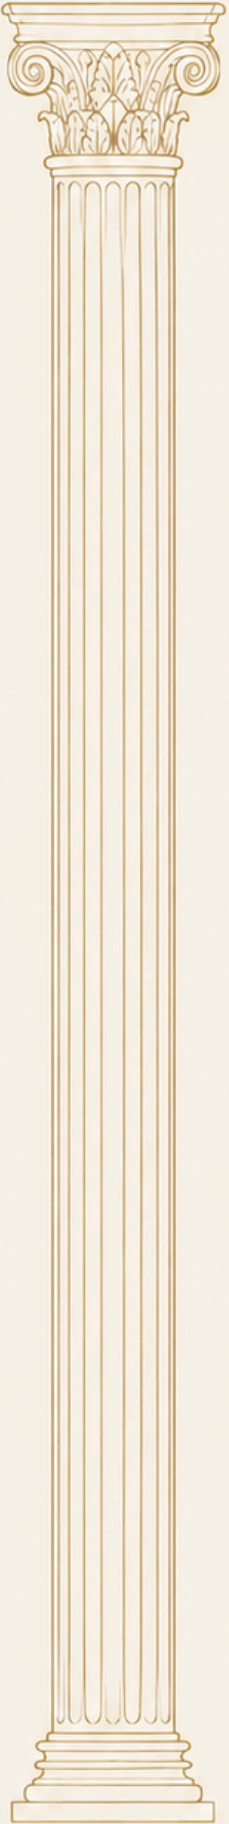

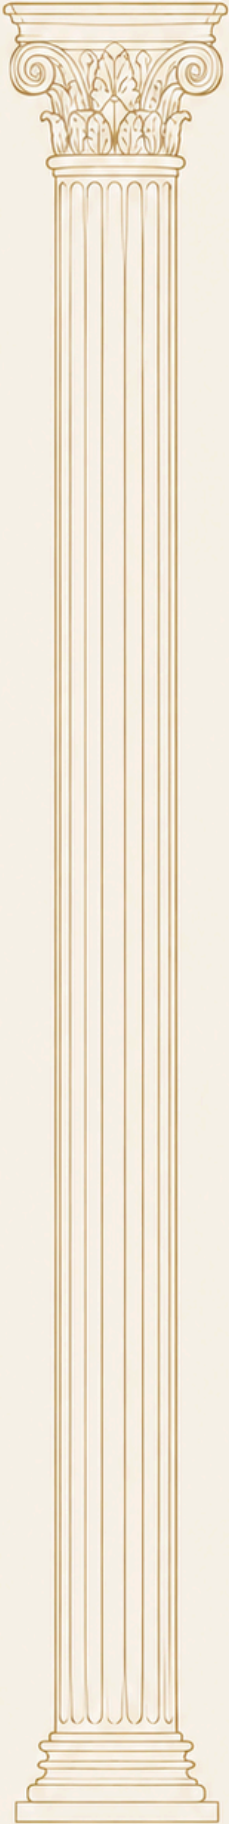

Lockdown

Hammer weak domains. 80%+.

PHASE IV

Exam Week

Light review. Sit the exam.

BUILT FROM A REAL CERT PREP

I needed a study system and wanted to see what I could build using only AI and free resources. This template is the result — a working CompTIA Security+ SY0-701 prep, refined day by day.

25

TOPIC BLOCKS

9

DAILY STEPS

4

STUDY PHASES

Block 1: cold attempt 75% → oral drill → retake 93%. Block 2: cold 62% → drill → 3rd attempt, then move on. The system makes the next move obvious every single day.
